ERI - Data Science Internships / Work Placement Opportunities

Dear Hiring manager,

I am writing to apply for the Data Science Internship/Work Placement opportunity advertised by ERI. I am a hardworking and motivated first year Master of Data Science Student at Charles Darwin University with 2 years' experience with Python, also have familiarity with Tableau.

In addition to my technical abilities, I have developed a keen interest in Cyber Security and Governance, Risk, and Compliance (GRC). Understanding the importance of data integrity and security, I have dedicated time to studying best practices in these areas and am eager to contribute to projects that require a strong focus on maintaining secure and compliant data environments.

My strong analytical skills, combined with my passion for technology and problem-solving, make me confident in my ability to add value to your team.

I am enthusiastic about the prospect of joining ERI as an intern and am keen to bring my hard work, initiative, and potential to your organisation. Thank you for considering my application. I look forward to the opportunity to discuss how my background, skills, and aspirations align with the goals of ERI.

Yours sincerely,

Rohan Chhetry
